

The information contained in this document is provided for informational purposes only and represents no statement, promise, or guarantee by Cordis Corporation concerning levels of reimbursement, payment, or charge. Similarly, all CPT, ICD-10 and HCPCS codes are supplied for informational purposes only and represent no statement, promise, or guarantee by Cordis that these codes will be appropriate to specific circumstances or products or services provided or that reimbursement will be made. Providers are ultimately responsible for exercising their independent clinical judgment to determine medical necessity for individual patients and the appropriate billing process according to the applicable payer's current policy. CPT codes and descriptions are copyright 2019 American Medical Association. ICD-10 codes and descriptions are copyright 2019 World Health Organization; revised for use in the United States by the Centers for Medicare and Medicaid Services (CMS) and the Centers for Disease Control and Prevention's (CDC) National Center for Health Statistics (NCHS) as ICD-10-CM / ICD-10-PCS. Healthcare Common Procedure Coding System (HCPCS) Level II codes and descriptions are maintained by the CMS HCPCS Workgroup. The information contained in this document is taken from various publicly available documents, is current at the date of publication and is subject to change at any time.

## CPT® Codes and Physician Reimbursement

Medicare Part B pays for physician services based upon the Medicare Physician Fee Schedule (MPFS). Fee schedule amounts are calculated according to the Resource-Based Relative Value Scale (RBRVS), which is updated each year. Procedures are reported using CPT® codes.<sup>1</sup> The 2019 CPT Professional Edition Manual also provides specific instructions for reporting particular families of codes. Individual payers may also have guidelines and coverage policies regarding certain services. The following table lists the most commonly used codes for biliary diagnostic and therapeutic procedures.

| Procedure Codes and Physician Reimbursement for Endovascular Procedures |   |  |          |
|---|---|--|----------|
| CPT® Code   | Description   | 2019 Medicare Base Payment Rate <sup>2</sup> |          |
|   |   | Non-Facility                                 | Facility |
| <b>Nonselective and Selective Catheter Placement - Arterial</b>         |   |  |          |
| 36100   | Introduction of needle or intracatheter, carotid or vertebral artery  | \$534  | \$164    |
| 36140   | Introduction of needle or intracatheter, upper or lower extremity artery  | \$459  | \$94     |
| 36200   | Introduction of catheter, aorta   | \$585  | \$146    |
| 36215   | Selective catheter placement, arterial system; each first order thoracic or brachiocephalic branch, within a vascular family                  | \$1,060                                      | \$222    |
| 36216   | Initial second order thoracic or brachiocephalic branch, within a vascular family   | \$1,142                                      | \$286    |
| 36217   | Initial third order or more selective thoracic or brachiocephalic branch, within a vascular family  | \$1,914                                      | \$343    |
| +36218  | Additional second order, third order, and beyond, thoracic or brachiocephalic, within a vascular family                                       | \$248  | \$54     |
| 36245   | Selective catheter placement, arterial system; each first order abdominal, pelvic, or lower extremity artery branch, within a vascular family | \$1,349                                      | \$248    |
| 36246   | Initial second order abdominal, pelvic, or lower extremity artery branch, within a vascular family  | \$858  | \$266    |
| 36247   | Initial third order or more selective abdominal, pelvic, or lower extremity artery branch, within a vascular family                           | \$1,535                                      | \$316    |

<sup>1</sup> 2019 Current Procedural Terminology (CPT®), ©2019 American Medical Association. CPT® is a registered trademark of the American Medical Association.

<sup>2</sup> The MPFS payment amounts are based upon data elements published by the Centers for Medicare and Medicaid Services in the Final Rule CMS-1693-F on November 1, 2018, and published in the Federal Register on November 23, 2018, with a conversion factor of \$36.04. CMS may make adjustments to any or all of the data inputs from time to time.

| Procedure Codes and Physician Reimbursement for Endovascular Procedures |   |  |          |
|---|---|--|----------|
| CPT® Code   | Description   | 2019 Medicare Base Payment Rate <sup>2</sup> |          |
|   |   | Non-Facility                                 | Facility |
| +36248  | Additional second order, third order, and beyond, abdominal, pelvic, or lower extremity artery branch, within a vascular family | \$148  | \$51     |
| <b>Diagnostic Imaging - Arterial</b>                                    |   |  |          |
| 75600   | Aortography, thoracic, without serialography, radiological S&I  | \$203  | \$25     |
| 75605   | Aortography, thoracic, by serialography, radiological S&I   | \$136  | \$57     |
| 75625   | Aortography, abdominal, by serialography, radiological S&I  | \$134  | \$57     |
| 75630   | Aortography, abdominal plus bilateral iliofemoral lower extremity, catheter, by serialography, radiological S&I                 | \$169  | \$90     |
| 75635   | Computed tomographic angiography, abdominal aorta and bilateral iliofemoral lower extremity runoff, with contrast material(s)   | \$449  | \$121    |
| 75705   | Angiography, spinal, selective, radiological S&I  | \$257  | \$120    |
| 75710   | Angiography, extremity, unilateral, radiological S&I  | \$170  | \$88     |
| 75716   | Angiography, extremity, bilateral, radiological S&I   | \$182  | \$98     |
| 75726   | Angiography, visceral, selective or supraseductive (with or without flush aortogram), radiological S&I                          | \$147  | \$56     |
| 75731   | Angiography, adrenal, unilateral, selective, radiological S&I   | \$170  | \$59     |
| 75733   | Angiography, adrenal, bilateral, selective, radiological S&I  | \$183  | \$65     |
| 75736   | Angiography, pelvic, selective or supraseductive, radiological S&I  | \$158  | \$56     |
| 75741   | Angiography, pulmonary, unilateral, selective, radiological S&I   | \$149  | \$65     |
| 75743   | Angiography, pulmonary, bilateral, selective, radiological S&I  | \$167  | \$82     |
| 75746   | Angiography, pulmonary, by nonselective catheter or venous injection, radiological S&I  | \$150  | \$57     |
| 75756   | Angiography, internal mammary, radiological S&I   | \$173  | \$58     |
| +75774  | Angiography, selective, each additional vessel studied after basic examination, radiological S&I                                | \$84   | \$18     |
| <b>Nonselective and Selective Catheter Placement - Venous</b>           |   |  |          |
| 36005   | Injection procedure for extremity venography  | \$316  | \$50     |
| 36010   | Introduction of catheter, superior or inferior vena cava  | \$515  | \$115    |
| 36011   | Selective catheter placement, venous system; first order branch   | \$866  | \$164    |
| 36012   | Second order, or more selective, branch   | \$883  | \$181    |
| <b>Diagnostic Imaging - Venous</b>                                      |   |  |          |
| 75820   | Venography, extremity, unilateral, radiological S&I   | \$114  | \$36     |
| 75822   | Venography, extremity, bilateral, radiological S&I  | \$133  | \$53     |
| 75825   | Venography, caval, inferior, with serialography, radiological S&I   | \$133  | \$57     |
| 75827   | Venography, caval, superior, with serialography, radiological S&I   | \$138  | \$58     |

| <b>Vena Cava Filters</b>  |   |  |          |
| 37191   | Insertion of intravascular vena cava filter, endovascular approach  | \$2,521                                      | \$234    |
| 37192   | Repositioning of intravascular vena cava filter, endovascular approach  | \$1,351                                      | \$360    |
| 37193   | Retrieval (removal) of intravascular vena cava filter, endovascular approach  | \$1,588                                      | \$366    |
| <b>Dialysis Circuit Imaging and Intervention</b>                        |   |  |          |
| 36901   | Introduction of needle(s) and/or catheter(s), dialysis circuit, with diagnostic angiography of the dialysis circuit, including inferior or superior vena cava;  | \$661  | \$176    |
| 36902   | With transluminal balloon angioplasty, peripheral dialysis segment  | \$1,301                                      | \$252    |
| 36903   | With transcatheter placement of intravascular stent(s), peripheral dialysis segment   | \$5,485                                      | \$333    |
| 36904   | Percutaneous transluminal mechanical thrombectomy and/or infusion for thrombolysis, dialysis circuit, any method, including all imaging and radiological supervision and interpretation, diagnostic angiography, fluoroscopic guidance, catheter placement(s), and intraprocedural thrombolytic injection(s); | \$1,914                                      | \$388    |
| 36905   | With balloon angioplasty, peripheral dialysis segment   | \$2,407                                      | \$465    |
| 36906   | With placement of intravascular stent(s), includes angioplasty  | \$6,724                                      | \$537    |
| +36907  | Transluminal balloon angioplasty, central dialysis segment  | \$736  | \$153    |
| +36908  | Transcatheter placement of intravascular stent(s), central dialysis segment   | \$2,451                                      | \$220    |
| +36909  | Dialysis circuit permanent vascular embolization or occlusion   | \$1,981                                      | \$210    |
| <b>Thrombolysis</b>   |   |  |          |
| 37211   | Transcatheter arterial infusion for thrombolysis, initial treatment day   | \$0  | \$404    |
| 37212   | Transcatheter venous infusion for thrombolysis, initial treatment day   | \$0  | \$354    |

| Procedure Codes and Physician Reimbursement for Endovascular Procedures |   |  |          |
|---|---|--|----------|
| CPT® Code   | Description   | 2019 Medicare Base Payment Rate <sup>2</sup> |          |
|   |   | Non-Facility                                 | Facility |
| 37213   | Transcatheter arterial or venous infusion for thrombolysis, continued treatment on subsequent day; including follow-up catheter contrast injection, position change, or exchange, when performed; | \$0  | \$244    |
| 37214   | Cessation of thrombolysis including removal of catheter and vessel closure by any method  | \$0  | \$129    |
| <b>Mechanical Thrombectomy</b>  |   |  |          |
| 37184   | Primary percutaneous transluminal mechanical thrombectomy; initial vessel   | \$2,171                                      | \$467    |
| +37185  | Second and all subsequent vessel(s) in the same vascular family   | \$669  | \$175    |
| +37186  | Secondary percutaneous transluminal thrombectomy in conjunction with another percutaneous intervention  | \$1,350                                      | \$256    |
| 37187   | Percutaneous transluminal mechanical thrombectomy, vein(s)  | \$2,002                                      | \$411    |
| 37188   | Percutaneous transluminal mechanical thrombectomy, vein(s), repeat treatment on subsequent day during course of thrombolytic therapy  | \$1,684                                      | \$289    |
| <b>Embolization / Occlusion</b>   |   |  |          |
| 37241   | Vascular embolization or occlusion, inclusive of all radiological S&I; venous, other than hemorrhage  | \$4,950                                      | \$463    |
| 37242   | Arterial, other than hemorrhage or tumor  | \$7,622                                      | \$500    |
| 37243   | For tumors, organ ischemia, or infarction   | \$9,861                                      | \$589    |
| 37244   | For arterial or venous hemorrhage or lymphatic extravasation  | \$7,052                                      | \$696    |
| 75894   | Transcatheter therapy, embolization, any method, radiological S&I   | \$0  | \$74     |
| <b>Other Supportive Procedures</b>                                      |   |  |          |
| +37252  | Intravascular ultrasound; initial noncoronary vessel  | \$1,290                                      | \$96     |
| +37253  | Each additional noncoronary vessel  | \$202  | \$77     |
| 75898   | Angiography through existing catheter for follow-up study for transcatheter therapy, embolization or infusion, other than for thrombolysis  | \$0  | \$93     |
| 37197   | Transcatheter retrieval, percutaneous, of intravascular foreign body  | \$1,564                                      | \$316    |

### Ambulatory Surgery Center (ASC) Reimbursement

In general, the ASC payment rate for services is set at approximately 65% of the payment rate for the same service under the HOPPS, with some exceptions.<sup>3</sup> For example, for device-intensive services (where device costs account for more than 50 percent of the total cost of the service), ASCs receive the same payment rate for the device cost as under the HOPPS, with payment for the service portion of the ASC rate calculated at the usual percentage rate of the corresponding OPSS service payment. ASCs will not typically bill separately for these devices.<sup>4</sup>

CMS has assigned APC-based payment rates in an Ambulatory Surgery Center only to surgical procedure codes – CPT® codes in the range 10000 – 69999, plus a few Category III codes, C-codes, and G-codes. Radiology procedures, supplies, and devices are considered ancillary to the surgical procedure; while some are reimbursed additionally, no separate payment is made for cholangiography imaging procedures.

| CPT® Code   | Description  | 2019 Medicare Base Payment Rate <sup>5</sup> |
| 37187   | Percutaneous transluminal mechanical thrombectomy, vein(s)   | \$2,721                                      |
| 37188   | Percutaneous transluminal mechanical thrombectomy, vein(s), repeat treatment on subsequent day during course of thrombolytic therapy | \$1,305                                      |
| Other Supportive Procedures   |  |  |
| 37197   | Transcatheter retrieval, percutaneous, of intravascular foreign body   | \$1,305                                      |

Notes: Most add-on codes are status "N1", indicating they are packaged into the primary procedure.

## Hospital Outpatient Reimbursement

Outpatient facility claims also report CPT® and HCPCS codes, which map to Ambulatory Payment Classifications (APCs), which assign a Medicare hospital outpatient payment rate for the service. Depending upon the services provided, hospitals may receive payment for more than one APC per patient encounter. If a claim contains services that result in an APC payment but also contains packaged services, no separate payment for the packaged services will be provided, as these are included in the APC. However, charges related to the packaged services are used for outlier and Transitional Corridor Payments (TOPs) as well as for future rate setting. Therefore, it is extremely important that hospitals report all HCPCS codes consistent with their descriptors; CPT® and/or CMS instructions and correct coding principles, and all charges for all services they furnish, whether payment for the services is made separately or is packaged.

| Common APCs for Endovascular Procedures <sup>7</sup> |  |                  |                      |                                 |
|--|--|------------------|----------------------|---------------------------------|
| APC  | Description  | Status Indicator | 2019 Relative Weight | 2019 Medicare Base Payment Rate |
| 5181   | Level 1 Vascular Procedures (codes 36901, 37213, 37214, 76731, 75746, 75820, 75822, 75827, 75870, 75872, 75880, 75898)   | T                | 7.799                | \$620                           |
| 5182   | Level 2 Vascular Procedures (codes 36221, 36222, 36225, 36251, 36252, 36254, 37192, 37193, 37213, 37214, 37188, 37192, 37193, 37197, 37212, 75600, 75625, 75630, 75658, 75710, 75716, 75733, 75741, 75743, 75756, 75825, 75831, 75833, 75840, 75860) | (Q2) T           | 13.758               | \$1,094                         |
| 5183   | Level 3 Vascular Procedures (codes 36223, 36224, 36226, 36253, 37191, 37211, 37184, 37187, 37191, 37211, 75605, 75705, 75726, 75736, 75842)  | T                | 31.896               | \$2,535                         |
| 5191   | Level 1 Endovascular Procedures (codes 37220, 37224)   | J1               | 33.207               | \$2,640                         |
| 5192   | Level 2 Endovascular Procedures (codes 36902, 36904, 37220, 37224, 37236, 37238, 37246, 37248)   | J1               | 48.921               | \$3,889                         |
| 5193   | Level 3 Endovascular Procedures (codes 36903, 36905, 37221, 37225, 37226, 37228, 37236, 37238, 37241-37244, 0234T, 0236T, 0237T)   | J1               | 99.104               | \$7,878                         |
| 5194   | Level 4 Endovascular Procedures (codes 36906, 37227, 37229, 37230, 37231, 0238T)   | J1               | 160.826              | \$12,784                        |
| 5571   | Level 1 Imaging with Contrast (code 75635)   | Q2 (S)           | 2.537                | \$202                           |

Notes: Diagnostic catheter placement codes are packaged with the related imaging procedure, whereas imaging guidance is packaged with interventional procedures. Carotid

<sup>6</sup>Healthcare Common Procedural Coding System (HCPCS) codes are developed by CMS and available in book form from several different publishers.

artery stenting procedures (37215-37218) are not reimbursed through HOPPS, but are classified as inpatient-only procedures. Most add-on codes are status "N", indicating they are packaged into the primary procedure.

OPPS payment status indicators (SIs) indicate whether a service represented by a HCPCS or CPT® code is payable under the OPPS or another payment system, and also whether particular OPPS policies apply to the code (eg, multiple procedure discounts or other payment reductions, full separate payment, or is a service packaged with another procedure). Relevant OPPS Status Indicators include:

- C Inpatient Procedures; not paid under OPPS.
- J1 Comprehensive code: all covered Part B services on the claim are packaged with the primary J1 service for the claim, except services with OPPS SI = F, G, H, L and U; ambulance services; diagnostic and screening mammography; all preventive services; and certain Part B inpatient services.
- N Payment is packaged into payment for other services, including outliers; no separate APC payment.
- Q2 T-Packaged Codes: (1) packaged APC payment if billed on the same claim as a HCPCS code assigned status indicator "T"; (2) in other circumstances, payment is made through a separate APC payment.
- S Procedure or service not discounted when multiple; separate APC payment.
- T Significant procedure, multiple procedure reduction applies; separate APC payment.

## Modifiers

When submitting a particular service on a claim, it is sometimes necessary to report a modifier with the CPT® code. A modifier allows a way to indicate that a service or procedure that has been performed has been altered by some specific circumstance but not changed in its definition or code. Modifiers also enable health care professionals to effectively respond to payment policy requirements established by other entities. Some modifiers apply to either physician or hospital outpatient claims; some may only be relevant for one or the other. A complete list of modifiers is included in the HCPCS and CPT® coding books; the concept of modifiers does not apply to ICD-10-PCS procedure codes.

## Hospital Inpatient Reimbursement

### Selecting the Appropriate ICD-10-PCS Code

ICD-10-PCS, including the ICD-10-PCS Official Guidelines for Coding and Reporting, replaced ICD-9-CM procedure codes for dates of discharge for inpatients that occur on or after October 1, 2015. ICD-10-PCS is not related to ICD-10-CM, but was developed specifically to meet healthcare needs for a procedure code system.

The following table lists some of the most commonly used code categories for endovascular diagnostic and therapeutic procedures. Given the large number of individual procedure codes available for procedures in ICD-10-PCS, please refer to your coding reference book or coding software to look up the associated Body Part, Approach, Contrast, Device and/or Qualifier that best align to the procedure performed as identified below.

| Comon ICD-10-PCS Endovascular Procedure Code Categories <sup>7</sup> |   |   |  |
|--|---|---|--|
| Procedure  | Description                             | Procedure                                       | Description                                |
| <b>Angiography and Other Imaging</b>                                 |   | <b>Percutaneous Atherectomy or Thrombectomy</b> |  |
| B21----  | Imaging of heart, fluoroscopy           | 03C-3Z-   | Percutaneous extirpation of upper arteries |
| B31----  | Imaging of upper arteries, fluoroscopy  | 04C-3Z-   | Percutaneous extirpation of lower arteries |
| B41----  | Imaging of lower arteries, fluoroscopy  | 05C-3ZZ   | Percutaneous extirpation of upper veins    |
| B51----  | Imaging of veins, fluoroscopy           | 06C-3ZZ   | Percutaneous extirpation of lower veins    |
| B34-ZZ3  | Intravascular imaging of upper arteries | <b>Occlusion / Embolization</b>                 |  |

| 06PY– – Z  | Removal (of device), lower vein         | 3E0– – – –                        | Injection or infusion               |

If different methodologies are used in different sites of a single vessel (eg, angioplasty only, angioplasty with stenting, or atherectomy), the same root operation is performed on multiple body parts (eg, peripheral vessels), or if multiple root operations with different objectives are performed on the same body part, code each separately.<sup>8</sup>

### MS-DRGs

Medicare reimburses inpatient hospital services under the Inpatient Prospective Payment System (IPPS), which bases payment on Medicare Severity Diagnosis-Related Groups (MS-DRGs). The MS-DRG payment system groups similar diagnoses into a single payment level, and reimburses the hospital according to the extent of resources typically required to treat patients with similar diagnoses undergoing similar treatments.

All services and supplies provided during the inpatient admission are bundled into a single MS-DRG reimbursement rate, regardless of the length of the inpatient stay, the intensity of treatments, or the number of procedures performed for the specific individual.

| Common MS-DRGs for Endovascular Procedures <sup>9</sup> |   |                          |                      |   |
|---|---|--------------------------|----------------------|---|
| MS-DRG  | Description                                       | 2019 Mean Length of Stay | 2019 Relative Weight | 2019 Medicare Base Payment Rate <sup>10</sup> |
| 034   | Carotid artery stent procedure with MCC           | 6.8                      | 3.599                | \$21,979                                      |
| 035   | Carotid artery stent procedure with CC            | 3.0                      | 2.220                | \$13,556                                      |
| 036   | Carotid artery stent procedure without CC/MCC     | 1.4                      | 1.726                | \$10,538                                      |
| 166   | Other respiratory system O.R. procedures with MCC | 10.2                     | 3.498                | \$21,357                                      |
| 167   | Other respiratory system O.R. procedures with CC  | 5.6                      | 1.897                | \$11,586                                      |

| Common MS-DRGs for Endovascular Procedures <sup>9</sup> |  |                          |                      |   |
|---|--|--------------------------|----------------------|---|
| MS-DRG  | Description  | 2019 Mean Length of Stay | 2019 Relative Weight | 2019 Medicare Base Payment Rate <sup>10</sup> |
| 168   | Other respiratory system O.R. procedures without CC/MCC  | 3.0                      | 1.341                | \$8,191                                       |
| 252   | Other vascular procedures with MCC                       | 7.6                      | 3.259                | \$19,903                                      |
| 253   | Other vascular procedures with CC                        | 5.4                      | 2.594                | \$15,839                                      |
| 254   | Other vascular procedures without CC/MCC                 | 2.8                      | 1.81                 | \$11,051                                      |
| 270   | Other major cardiovascular procedures with MCC           | 9.5                      | 5.061                | \$30,904                                      |
| 271   | Other major cardiovascular procedures with CC            | 5.8                      | 3.493                | \$21,331                                      |
| 272   | Other major cardiovascular procedures without CC/MCC     | 2.8                      | 2.618                | \$15,985                                      |
| 299   | Peripheral vascular disorders with MCC                   | 5.2                      | 1.450                | \$8,855                                       |
| 300   | Peripheral vascular disorders with CC                    | 4.1                      | 1.023                | \$6,250                                       |
| 301   | Peripheral vascular disorders without CC/MCC             | 2.8                      | 0.726                | \$4,434                                       |
| 673   | Other kidney and urinary tract procedures with MCC       | 10.9                     | 3.577                | \$21,841                                      |
| 674   | Other kidney and urinary tract procedures with CC        | 7                        | 2.312                | \$14,116                                      |
| 675   | Other kidney and urinary tract procedures without CC/MCC | 3.6                      | 1.625                | \$9,923                                       |

MCC = major complication or comorbidity  
 CC = complication or comorbidity

<sup>9</sup>Centers for Medicare and Medicaid Services, FY19 Final Notice Data, Table 5 - List of Medicare Severity Diagnosis-Related Groups (MS-DRGs), Relative Weighting Factors, and Geometric and Arithmetic Mean Length of Stay; <http://www.cms.gov/AcuteInpatientPPS/> (under Acute Inpatient – Files for Download)  
<sup>10</sup>The MS-DRG payment amounts indicated are estimates only based upon data elements derived from various CMS sources. MS-DRG national average payments were calculated with a base rate of \$6,105.49 using the national adjusted operating standardized amounts and the capital standard federal payment rate as issued in the Medicare Inpatient Prospective Payment System Final Rule published in the Federal Register (Vol 83, Issue 119) on 11/23/2018; Tables 1A and 1D, Table 5, and assume that all hospitals are receiving the full 1.65% quality reporting and meaningful use updates. Actual payment may vary based on various hospital-specific factors not reflected in the source data.

The information in this guide is broad-based and references many different procedures and types of devices. Such a broad discussion is not intended to suggest or imply that Cordis® offers products for every use or procedure discussed and the FDA-cleared or approved labeling for all products may not be consistent with the information in this guide. Important information: Prior to use, refer to the instruction for use supplied with this device for indications, contraindications, side effects, suggested procedure, warnings and precautions.

Caution: Federal (USA) law restricts this device to sale by or on the order of a physician.
